

## BaySystems / EnergyWise Synergy

### There is No Better Way to Build

“Green building” is a red-hot phenomenon. Type the term into any web search engine, and the result will be millions of corresponding links. While it is wonderful to have all of this pertinent information at our fingertips, it also creates a significant challenge for the typical new building owner to use these resources in determining the best way to build. After all, you have only one opportunity to build a new structure correctly, and the last thing anyone needs is to later regret what may be the largest purchase decision they will ever make.

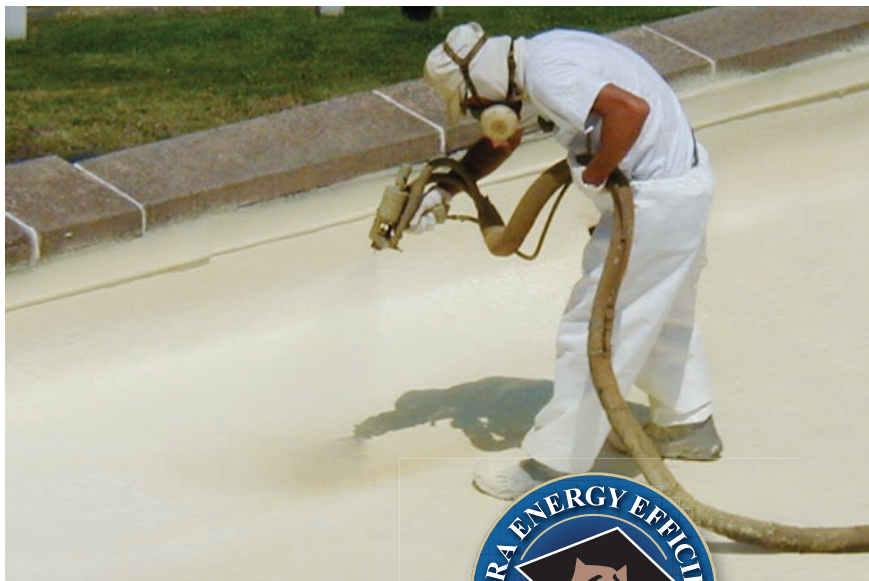

### Two Great Companies, One Remarkable Package

Everyone knows the name Bayer. It is synonymous with quality, integrity and reliability. BaySystems, a fully owned subsidiary of Bayer, has teamed with EnergyWise, one of the nation’s leading thermal engineering firms. The goal of this

“When we decided to build several projects, we wanted to use the very best engineering resource we could find. EnergyWise Structures came highly recommended. I am very pleased with Richard Rue and the results I have achieved using his company. I would recommend EnergyWise to anyone.”

— Barry Switzer (shown above with Richard Rue of EnergyWise)  
Former Head Coach, University of Oklahoma and The Dallas Cowboys

partnership is to provide an ultra energy efficient, healthy building package that performs so well that it makes other energy efficiency programs and current building code requirements pale in comparison.

In fact, when correctly implemented, our proven technology and engineering system yield guaranteed results\* that are unparalleled in the industry. Thousands of successfully engineered and monitored construction projects confirm this.

*The combination of BaySystems foam insulation and EnergyWise engineering guarantees ultra energy efficient, healthy results and peace of mind. Your local EnergyWise certified foam contractor can help define the process.*
